

## Check Out Our New Feed Trailer!

MONTICELLO, IA – The first of two new feed trailers from CEI Pacer was obtained this week. This unit is a triple-axle trailer with a capacity of 30 tons vs. the 24 ton units we have been running. This trailer along with a four axle tractor allows IAS to take advantage of Iowa's bridge law that can have a tractor/trailer setup properly gross 96,000 lbs. vs. the standard 80,000 lb. limit.

One exciting change done with this first trailer was to incorporate our purpose statement into the graphics done. We have placed the wording "Growing Relationships to Maximize Success" onto this unit and plan to use this whenever we can when placing graphics onto new equipment.
