## **Innovative Ag Services Internship Program a Hit!**

Monticello, IA— August 15, 2017

Innovative Ag Services (IAS) had a great group of Interns again this past summer. IAS employed 10 Interns in the Agronomy, Operations and Feed areas of the business.

The interns had a busy schedule throughout the summer working along side their mentors. Depending on the area of the business the intern was hired into they may have experienced all or variety of the following: Sirrus SST Training, BASF Training, Plot Training, worked on Operational Projects, spent a day listening to various speakers from the company, and attended Industry tours at East Dubuque Nitrogen Fertilizer and Prairie Farms. As a Thank you to our Interns we held a end of the summer wrap up Golf Outing and BBQ at 3 Elms Golf Course in Independence, IA.

It is always a real pleasure having these students come they don't only learn from us we learn from them.

Innovative Ag is looking forward to recruiting for our 2018 Summer Internship Program.

July: HR Roundtable Event—Speakers from multiple departments spoke to interns.

August: Intern Wrap Up BBQ and Golf Outing—Beautiful Day!
