

## IAS Supports North Butler School District

GREENE, IA - - Steve Stark, Packard Location Manager, presented a donation to the North Butler School District for the renovation of their track facility. Innovative Ag Services' donation of \$2,000 was matched with funds from the Land O' Lakes Foundation for a total of \$4,000. Our donation will help them upgrade the limestone track to an all-weather track and remodel the current concession stand, restrooms and bleachers to make them handicap accessible. They would also like to improve the equipment and fencing and construct a new shed for storage. These improvements are needed to make North Butler's track a preferred venue for practices, sporting events and year-round community wellness.

Innovative Ag Services supports local projects which impact its members and employees and provide a benefit to the entire community.
